

# AUTOMATIC SYNC

---

## TECHNOLOGIES

Automatic Sync Technologies is a leading provider of automated voice synchronization and voice recording search tools for a wide range of multimedia production applications. Leveraging our leading-edge speech processing and pattern identification software, Automatic Sync Technologies provides clients with solutions for synchronized multimedia with quick turnaround and unsurpassed quality.

Our mission is to improve efficiency for businesses requiring the synchronization of voice and text. We accomplish this by leveraging our 30 plus years of software engineering experience and computer science expertise in the following areas.

- Speech Synchronization
- Speech Recognition
- Voice and Audio Processing
- Voice Alteration
- Computer Graphics
- Digital Animation
- Multimedia Production
- Software Engineering

This expertise is the foundation that enables Automatic Sync Technologies to offer our clients the best solutions for multimedia production. Our experience level provides our customers with unparalleled customer satisfaction.

Automatic Sync Technologies is a profitable, privately held company located in the San Francisco Bay area.
