CaptionSync
by Automatic Sync Technologies

CaptionSync Smart Player – Overview

The CaptionSync Smart Player™ is an innovative and efficient way to deliver captioned and described video to end users. For over four years the CaptionSync Smart Player has received rave reviews from educators, thanks to its interactive features that leverage transcript and caption data to create a more engaging experience for learners. Learners can select individual words in the transcript to jump to the specific point in the video or look up words in a dictionary or encyclopedia. The CaptionSync Smart Player incorporates Universal Design for Learning (UDL) principles by providing both additional representations of the video content and additional ways to engage with the content.

Features

- Interactive transcripts that allow you to see the text and immediately jump to any point in the video by clicking on a word in the transcript
- Text search
- Dictionary lookup
- Wikipedia lookup
- WCAG 2.1 Level AA compliance with high con trast layout, keyboard controls, and audio description features
- SEO and search improvements with fully-in dexed content for web crawlers
- Trim the video and share a clip via Facebook, Twitter or direct URL
- Embed the player on a website or in your LMS
- Caption online videos you don't own
- Add search and other interactive features to podcasts and other audio-only files
